--SEE OFFICE ACTION ON THE FOLLOWING PAGES--

Art Unit: 3736

1. Claims 14-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 16, line 3, "perfusion holes" lacks positive antecedent basis. Claim 17 is directed to the intended use of the radioactive dose and fails to further limit the apparatus. In claims 18-19 the use of "capable of" is indefinite in that it is unclear whether the function is performed or not. Claims 14 and 18-19 appear to add the balloon into the claim, however as discussed in the declaration and looking at the claims this merely appears to be adding back in what was removed from the claims for these new claims, thereby making it unclear how these are not duplicates of the existing independent claims.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

3. Claims 6-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Van't Hooft.

Art Unit: 3736

4. Claims 6-7, 10-11 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Liprie.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8-9, 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Liprie in view of Zouboulis.

Liprie discloses the claimed device except for the specific use of the radioactive dose in a liquid or gaseous form. Zouboulis teaches that it is well known to use a radioactive substance in a form other than solid, i.e. liquid. Therefore a modification of Liprie such that the radioactive dose is in any well known and conventionally used form would have been obvious to one skilled in the art.

7. Claims 1-5 are allowed.
